

## Add Items to Your Library in Zotero

1. With Zotero running in the background, browse to a library website, perform a search, and click Zotero's context-sensitive icon. *Note: in this example the icon will be a folder. Sometimes the icon might be something else (e.g., a book), and may add items to your library without doing the steps listed below.*

2. From the list that appears, choose the items you want and click OK.

3. The books appear in Zotero.
