

Download and Install Zotero

1. Visit <https://www.zotero.org> and download both Zotero and the browser connector.
(You must install both, or Zotero will not work properly! This is the single-most common problem that AMBS support personnel find when students report troubles with Zotero.)

2. Thereafter, make a habit of starting Zotero every time you start your web browser or word processor
(Zotero must be running while you work, even if it is minimized! This is the second-most common problem that AMBS support personnel find when students report troubles with Zotero.)
