

Insert Citations with Zotero

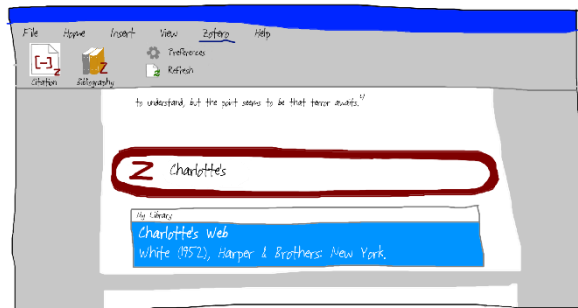

1. Position your cursor where you want your citation. Then click the Add/Edit Citation option on the Zotero ribbon or menu. *Do not use your word processor's built-in reference tools.*

2. If you have not yet set your document preferences, Zotero will present the document preferences dialog. For AMBS work, choose Chicago Manual of Style (full-note) and select the Footnotes option.

3. Search for an item in your library. Zotero displays matches. Click the item to select it, and repeat if you want to cite more than one resource at a time.

4. To add a page number, click a resource placeholder and type the page number at the appropriate location. Press Enter once to register the page number; once more to insert the citation.
